

Syncopated Beat

Overview

Points: 300

Category: Steganography

Description

We know there's a hidden message somewhere here, but none of our steg tools are able to reveal it. Maybe we need to think outside the box?

It is a well-known fact that demons sometimes hide messages in music. Demons speak lyrics to the musicians, and the demons insinuate their evil messages into the song.

Find the flag and enter it like this (all caps, dashes separating words): `flag{SYNCOATED-BEATS-ARE-EVIL}`

Approch

Download the video and convert it into audio file.

2:03 starts weird speech so I thought the audio would be reversed. I reversed the audio using audacity. Now listening to audio gives clear speech which says

time is Reversible but the music is not go back go back ! , but before you do dont forget to enter the flag which is electric light orcestra all caps seperated by dashes

So the flag is `flag{electric-light-orchestra}`
