

VOICE

Overview

Points: 50

Category: Steganography

Description

A friend of mine sent me an audio file which supposes to tell me the time of our night out meeting, but I can't comprehend the voice in the audio file. Can you help me figure it out? I want to hang out with my friends.

Approach

Here I used audacity to analyse the audio file.

Load the audio and go to menu > spectrogram

We got the flag! :)
