

cringeNcoder

so the site encodes the text that we sent

given → [!] Only use lowercase letters and numbers

if we use lowercase it encodes on lower, if we use numbers it encodes with caps and number

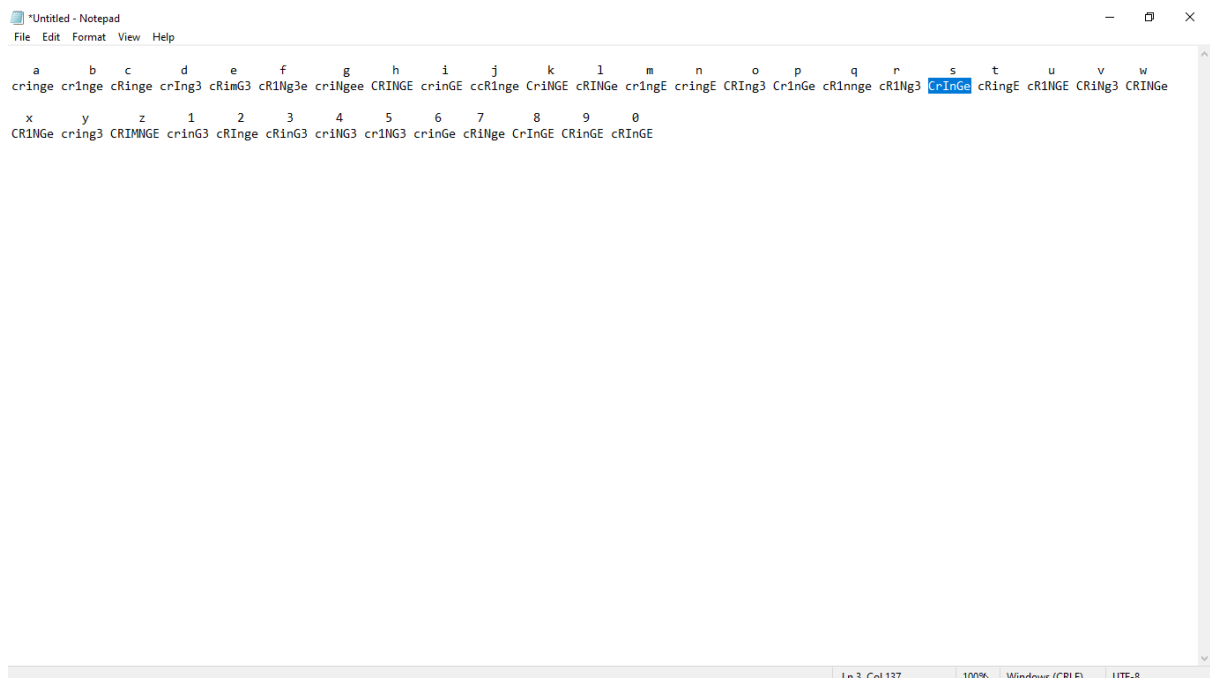

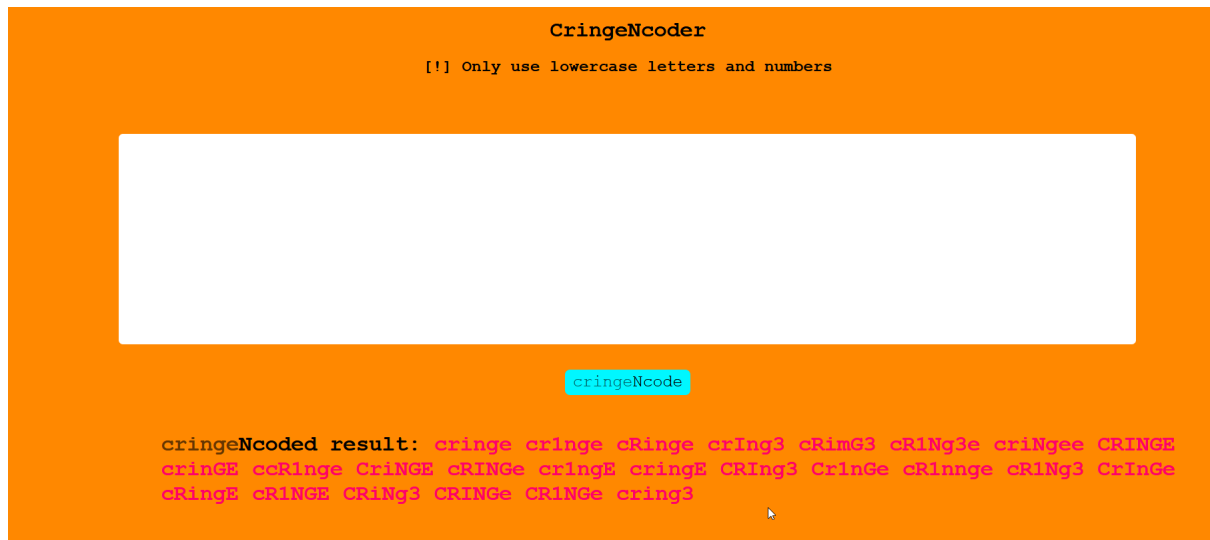

if we use "flag" → it encodes differently than other lowercase numbers

Visiting /flag we get this

TamilCTF{f1}

So now we find the encoding of a-z and 0-9

cR1Ng3e crinG3 cringE cringe cRINGe cRINGe cring3 crinG3 cringE cringE cRinG3
Cr1nGe cRimG3 criNG3 cRinge cRimG3 cringe cR1Ng3e cRiNge cRinG3 cR1Ng3
CrInGe CRIng3 cr1ngE criNG3 cringE cring3 cRinge cR1Ng3 crinGE cringE criNgee
cRinG3 CrInGe → comapre it and we find the flag

Flag → TamilCTF{f1nally1nn3pe4ceaf73rs0m4nycring3s}
